

IMPORTANT NOTICE - WORK TO GULLIES IN THE PARISH

Following an initial inspection of the Gullies in the Parish which took place this week, as planned, it has become apparent that a further inspection as the blockage is more severe. It would seem that there is a blockage caused by cement or concrete going into the mains which has become mixed with roots and silt. Additional work is now required to remove the cement/concrete/root/silt before the work can be completed.

LCC Highways Department have informed the Parish Council that this additional work is scheduled but it is unlikely that this will be able to be carried out before Xmas, due to shortage of labour and shortage of funds.

Slippery signs have been placed in the area to avoid risk.

In addition to the above, it has been identified that there is a manhole cover surging at the junction of Gurney Lane/Poultney Lane, Kimcote. Again a more indepth inspection is required involving CCTV camera etc in order to determine the exact nature of the work required. Again, it is not expected that this work will be carried out before Xmas.

Any updates will be published on the PC Website. Please accept our apologies for any inconvenience caused.
